Eligible Equipment Review

Please review the list of equipment in your organization below. For equipment that shows as eligible, use the toggles in the far-right column to select those you want to equip with the JDLink connectivity service at no additional charge. This enables the flow of data to and from the associated equipment. Once enabled for the JDLink connectivity service you will not need to renew this in the future.

For equipment with terminals (MTGs) that are shown as ineligible, please contact your John Deere dealer for options on connecting with JDLink.

When you select to connect on equipment that currently has a JDLink subscription, the old subscription will end, and be replaced with the JDLink connectivity service according to the terms and conditions presented on the next screen. You may review the specific requirement for terminal eligibility [here](#).

JDLink connectivity service

Service Enabled

Thank you for completing the JDLink connectivity service enablement process! We are currently working on enabling the service on your selected terminal/equipment. It may take several minutes for the status to update and connectivity can take up to 1 day to enable if not already active.

To ensure we provide you with the best service possible, please review the following option:

Automatic Enrollment

- Selecting this option allows new terminals / equipment added to your organization to be activated with the JDLink connectivity service automatically according to the JDLink Telematic Service Agreement. Transfer of data to and from your future devices will begin without any additional actions.
- If you choose not to select this option, you can enable eligible terminals/equipment for the JDLink connectivity service as they are added to your organization.
